

Percents: Baby Boomers Use Technology?

Below we can see device ownership (by percentage) for different age groups.

Source: <https://www.statista.com/chart/13206/device-ownership-among-baby-boomers/>

From the 2016 U.S. Census Data annual estimates of U.S. resident population by age, we know that the size of each category of age is as follows:

Age Range	U.S. residents of this age
50-59	43,819,164
60-69	36,303,119
70+	32,424,112

1. Estimate the number of U.S. residents in the 50-59 age range that have Smartphones.
2. Estimate the number of U.S. residents in the 60-69 age range that have Smartphones.
3. Estimate the number of U.S. residents in the 70+ age range that have Smartphones.
4. Estimate the total number of U.S. residents 50+ that have Smartphones.
5. Using a similar technique to problems 1-4, estimate the total number of U.S. residents aged 50+ that have wearables.
6. The “Baby Boomers” are the generation born after World War II (between 1946 and 1964). Which age categories are really the “Baby Boomers”?
