## Antiderivative Block (Calculus)

Learning Goal: Practice with derivatives and antiderivatives and being careful to pay attention to which direction you are going. This is a (ideally) a two-player game.

Game Setup: There is a gameboard, a set of game tiles, and two sets of player ID cards (one set is X , one set is $=$ ). It is very important that the two game tile pages get printed back to back on cardstock so that when it is cut out, you might see correct pairs as the front and back of a card. The player cards (= or x ) should NOT be printed double sided.

| Find the derivative. | Find an antiderivative. |
| :---: | :---: |
| $\sin x$ | $\cos x$ |

1. Place all the game tiles on the gameboard (see note about levels below).
2. Players take turns declaring the answer for a card, then checking it. If they are correct, they get to stake a claim on the space. If they are incorrect, their opponent gets to claim the space.
3. The goal is to place four player ID cards on the board in a row, column, or on a diagonal.

Level 1: Place game tiles "derivative side" up.
Level 2: Place game tiles "antiderivative side" up.
Level 3: Place game tiles so that they are mixed, some derivative, some antiderivative sides up.

| Find the derivative. $\sin x$ | Find the derivative. $\cos x$ | Find the derivative. $\tan x$ | Find the derivative. $-\cos x$ |
| :---: | :---: | :---: | :---: |
| Find the derivative. $\csc x$ | Find the derivative. $\sec x$ | Find the derivative. $\cot x$ | Find the derivative. $-\sin x$ |
| Find the derivative. $x^{3}$ | Find the derivative. $x^{5}$ | Find the derivative. $x^{2}$ | Find the derivative. $2 x$ |
| Find the derivative. $\frac{x^{2}}{2}$ | Find the derivative. $\frac{x^{4}}{4}$ | Find the derivative. $\frac{x^{3}}{3}$ | Find the derivative. $\frac{x^{5}}{5}$ |
| Find the derivative. $e^{x}$ | Find the derivative. $2^{x}$ | Find the derivative. $10^{x}$ | Find the derivative. $\ln x$ |
| Find the derivative. $\frac{e^{2 x}}{2}$ | Find the derivative. $\frac{1}{2} \sin 2 x$ | Find the derivative. $\frac{1}{3} \tan 3 x$ | Find the derivative. $\frac{1}{4} \cos 4 x$ |
| Find the derivative. $e^{2 x}$ | Find the derivative. $\sin 3 x$ | Find the derivative. $\tan 4 x$ | Find the derivative. $\cos 2 x$ |
| Find the derivative. $(x+3)^{4}$ | Find the derivative. $(2 x+1)^{3}$ | Find the derivative. $\sin \left(x^{2}\right)$ | Find the derivative. $\sin ^{2} x$ |
| Find the derivative. $x^{1 / 2}$ | Find the derivative. $x^{-2}$ | Find the derivative. $\frac{2}{3} x^{3 / 2}$ | Find the derivative. $\frac{x^{-2}}{-2}$ |

| Find an antiderivative. $\sin x$ | Find an antiderivative. $\sec ^{2} x$ | Find an antiderivative. $-\sin x$ | Find an antiderivative. $\cos x$ |
| :---: | :---: | :---: | :---: |
| Find an antiderivative. $-\cos x$ | Find an antiderivative. $-\csc ^{2} x$ | Find an antiderivative. <br> $\sec x \tan x$ | Find an antiderivative. $-\csc x \cot x$ |
| Find an antiderivative. $2$ | Find an antiderivative. $2 x$ | Find an antiderivative. $5 x^{4}$ | Find an antiderivative. $3 x^{2}$ |
| Find an antiderivative. $x^{4}$ | Find an antiderivative. $x^{2}$ | Find an antiderivative. $x^{3}$ | Find an antiderivative. $X$ |
| Find an antiderivative. $\frac{1}{x}, x>0$ | Find an antiderivative. $10^{x} \ln 10$ | Find an antiderivative. $2^{x} \ln 2$ | Find an antiderivative. $e^{x}$ |
| Find an antiderivative. $-\sin 4 x$ | Find an antiderivative. $\sec ^{2} 3 x$ | Find an antiderivative. $\cos 2 x$ | Find an antiderivative. $e^{2 x}$ |
| Find an antiderivative. $-2 \sin 2 x$ | Find an antiderivative. $4 \sec ^{2} 4 x$ | Find an antiderivative. $3 \cos 3 x$ | Find an antiderivative. $2 e^{2 x}$ |
| Find an antiderivative. $2 \sin x \cos x$ | Find an antiderivative. $2 x \cos \left(x^{2}\right)$ | Find an antiderivative. $6(2 x+1)^{2}$ | Find an antiderivative. $4(x+3)^{3}$ |
| Find an antiderivative. $x^{-3}$ | Find an antiderivative. $x^{1 / 2}$ | Find an antiderivative. $-2 x^{-3}$ | Find an antiderivative. $\frac{1}{2} x^{-1 / 2}$ |
